

**ORGANIZATION CAPACITY ASSESSMENT AND MONITORING  
-OCAM- Tool**

Version 2  
August 2004

**Agency Reviewed:**  
**Date of Review:**  
**Persons Interviewed:**

## Introduction to the OCAM Tool and its Use:

### Purpose

The Organizational Capacity Assessment and Monitoring (OCAM) Tool<sup>1</sup> has been designed by World Relief Canada *for use during its visits to southern partners and supported programs*. Its purpose is to provide information for assessment of organizational capacity and program performance, and for identifying key areas where capacity-building, corrective and enhancing measures are warranted.

### Approach

This new version of our tool (ver2) tries to include more use of *objective* indicators, while at the same time retaining the positive contribution of more *subjective* opinions of partner and World Relief Canada staff. This is achieved by breaking the information collected into *two types* of information:

- The "OCAM Indicators" column is comprised as much as possible of that which is *objective* and *observable*, and indicates whether key components of reviewed organization and program exist or not.
- The "Supplementary Information" column collects more *subjective* opinions and *judgements* based on work experience and dialogue between the southern partner's staff and World Relief Canada.

Where a "Q" appears in the tool, it means the item identified is a QUESTION to be asked of the southern partner (or committee/group for the Participation/Ownership section). Where BULLETS appear in the OCAM Indicators column, the items are mostly things to be observed and/or reviewed (eg. minutes of a meeting) or an event (eg. interview with a Board). Where BULLETS appear in the Supplementary Information column, the items require more of a judgment by World Relief staff as to the quality and completeness of a parallel item in the OCAM Indicators column.

### Topics Covered

The OCAM Tool is comprised of the following *sections*:

1. Governance: A review of southern partner agency governance. To be completed with partner's Board/Executive members including CEO.
2. Management: A review of overall partner agency management. To be completed with partner's CEO and/or other senior management.
3. Finance: A review of overall partner agency financial systems, controls and their monitoring. Also a review of financial records for programs supported by World Relief Canada. To be completed with partner's Chief Financial Officer.
4. Program: A review of partner agency programs supported by World Relief Canada. To be completed with partner's Senior Program Manager on programs supported.
5. Participation/ Ownership: A review of committee/group/participant observations on programs supported by World Relief Canada. To be completed with committees/groups for programs supported.
6. Participant Case Studies: Collection of information for stories on families and their community who are benefiting from programs supported by World Relief Canada. To be completed with select program participants/ beneficiaries. To be accompanied by photos of the participant, their family, and action shots of work activities supported.

### Application

The process for applying the OCAM Tool is as follows:

1. Prior to each overseas visit, WRCanada staff will review the "OCAM Indicators" information on file and request southern partners to supply any missing information, either before or early during the visit.
2. During each visit, WRCanada staff will engage the partner and others in dialogue, gather further information, and through observation verify as much of the information as possible.
3. Near the end of each visit, WRCanada and the partner will review the information gathered, identify key strengths and weaknesses, and outline a brief post-trip follow-up *Action Plan* for organizational and program capacity-building and change. Action Plans are to identify what specific initiatives and changes are to occur, who is to initiate them, when, approximate cost, and who will finance each.
4. After each visit, WRCanada staff will document the information gathered, enter it into WRCanada's database, e-mail written Action Plans to partners, and conduct our assigned follow-up.
5. After receipt of *Action Plan*, partner will conduct their assigned follow-up.

---

<sup>1</sup> This OCAM Tool is available for use by other agencies including southern partners. WRCanada however requests that full accreditation be given to WRCanada for the tool or any part used thereof.
